Allnorth

Engineering

Previously operating as ACFN-Allnorth and established in 2009, we provide a variety of multidisciplinary engineering and technical services to the oil sands industry.

Our engineering services are provided in conjunction with our joint venture partner Allnorth. With 17 offices across Canada and the U.S., Allnorth has extensive experience in the mining, oil and gas, pulp and paper, infrastructure, chemical and power sectors.

With over 500 employees, and services spanning from surveying to project management, the possibilities and resources are limitless for engineering services.

Acden Allnorth provides the following services:

Engineering
- Civil
- Structural
- Process
- Mechanical
- Electrical & Automation

Support Services
- Construction Management
- Materials Testing and QA/QC Services
- Legal and Construction Surveying
- 3D Scanning Services

Acden Allnorth has capacity! Recently they were involved in a Tremie concrete pour in the Fort McMurray area. The pour was 40 hours and 55 min long. The pour involved 3,083.5 cubic meters of concrete which came in about 386 concrete truck loads from 2 different batch plants. 3 pump trucks were used (with one on stand-by) and 3 cranes for support. 100 plus people were onsite.
