

Multidisciplinary Engineering, Surveying, Materials Testing & 3D Laser Scanning

We execute full disciplined engineering through a single point of contact, providing our clients with innovative and practical project solutions.

Here's how:

- Lean execution, delivering on time and on budget
- Nationwide OQM certification, ensuring the quality management oversight your projects deserve
- 40 years of corporate experience, 500+ diversified professionals, and an extensive portfolio of Oil & Gas and Infrastructure projects

Multidisciplinary Engineering, Surveying, Materials Testing & 3D Laser Scanning

Established in 2008, the Acden Allnorth partnership provides engineering services to energy and infrastructure clients in the Wood Buffalo region. With over 500 professionals across 16 offices and a 40 year history, Allnorth has a proven ability to deliver efficiently and effectively for Acden Allnorth's clients.

Acden Allnorth's engineering division supports all phases of greenfield and brownfield projects, from conceptual planning and feasibility studies, through to preliminary and detailed design. Coupled with our in-house surveyors, material testing labs, 3D laser scanning equipment and satellite imaging, clients get practical solutions to complicated problems.

Acden Allnorth provides the following services:

Engineering

- Civil
- Structural
- Process
- Mechanical
- Electrical & Automation

Support Services

- 3D Laser Scanning
- Surveying
- Materials Testing & QA/QC Services
- Construction Monitoring
- Satellite Imaging
